

Bairns' Hoose

Bairns' Hoose Knowledge Exchange Programme 2025

Knowledge exchange is the process by which learning is translated between research, policy and professional practice. This programme will provide access to learning from international experts, policy teams and evaluation and research to help partnerships develop and formulate their Bairns' Hooses. We aim to support people to 'learn together', share their experiences and build a community of practice for Bairns' Hoose.

The learning, innovation and knowledge held by the partnerships will be shared with others across Scotland and internationally to celebrate our success and add to the knowledge on the practical application of the Barnahus model.

Webinar series

This series brings together learning, research and best practice from Scotland and across the world. Researchers and practitioners reflect on their Barnahus journey and present their learning and examples of good practice.

Webinars are open for anyone to register and attend.

Insights series

The Insights series is a virtual safe space where Pathfinders and Affiliates can come together to share, think and learn together. Improvement advisors from the national project team will facilitate a structured discussion on the good practice and collective challenges. Pathfinders and Affiliates will share their learning and work through challenges together. The discussion will develop the learning and improvement journey both locally and nationally.

The Insights series is open to Pathfinder and Affiliate partners and relevant subject matter experts.

General series: This will be scheduled based on specifically-requested topics or need for peer support.

General events are open to anyone to register and attend.
